Education

Seoul National University	Seoul, South Korea
MS in Statistics	Mar. 2024 – Feb. 2026
Korea University	Seoul, South Korea
BE in Food and Resource Economics, Double major in Statistics	Mar. 2018 – Feb. 2024
Military Service, 2020 – 2021	
The University of Texas at Austin	Texas, United States
Exchange Program, Economics	Aug. 2022 – Dec. 2022

Research Interests

Missing Data, Survival Analysis, Causal Inference, Uncertainty Quantification

Preprints

Kim, J. and Shin, Y. E. (2025). "Scalable and Efficient Multiple Imputation for Case-Cohort Studies via Influence Function-Based Supersampling." arXiv:2511.14692. [paper] [software]
Korean Statistical Society Graduate Student Paper Award (Winter Conference, 2025).

Research Experience

Prediction Model Lab, Seoul National University	Seoul, South Korea
Graduate Researcher (Advisor: Dr. Yei Eun Shin)	Jun. 2024 – Present

- Led as the primary graduate researcher on a project funded by the National Research Foundation of Korea: *"Multiple Imputation for Missing Covariates due to Epidemiological Sampling Designs"*.
- Proposed an influence function-based supersampling approach that imputes only a subset (e.g., 3%) of the missing covariates while preserving efficiency and unbiasedness.
- Devised weight calibration equations that integrate distinct sampling designs for a unified analysis.
- Applied the proposed method to the NIH–AARP Diet and Health Study to assess expensive biomarkers associated with pancreatic cancer risk using the Cox proportional hazards model.

Urban Informatics Lab, The University of Texas at Austin	Austin, United States
Undergraduate Research Assistant (Connected through Dr. Arya Farahi)	Oct. 2022 – Dec. 2022

- Aggregated and cleaned geotagged electric vehicle (EV)-related tweets across the U.S. using regular expressions and bot probability scores.
- Conducted hotspot analysis to identify regions with significant EV-related public sentiment.

Contributed Talks

Scalable and Efficient Multiple Imputation for Case-Cohort Studies via Influence Function-Based Supersampling	Dec. 2025
Korean Statistical Society, Seoul, Korea.	
Multiple Imputation for Incomplete Survival Data with Missing Covariates: Toward Valid Causal Inference	Jun. 2025
The 2nd Symposium on Causal Inference, Seoul, Korea (English).	

Honors and Awards

Graduate Student Paper Award   Dec. 2025
Awarded by the Korean Statistical Society (KSS) for a graduate student paper presentation.

Fellowship for Fundamental Academic Fields   May 2024; Feb. 2025
Awarded by Seoul National University for academic excellence and research potential.

Graduate Research Fellowship in Science and Engineering   Sep. 2024 – Aug. 2025
Awarded by the National Research Foundation of Korea through a competitive selection process.

Special Scholarship   Sep. 2022; Mar. 2023
Awarded by Korea University for academic excellence.

Semester High Honors   Sep. 2018; Mar. 2022; Mar. 2023
Recognized by Korea University for academic excellence.

Agricultural Economics Alumni Scholarship   Mar. 2022
Awarded by Korea University, Department of Food and Resource Economics for academic excellence.

Teaching Assistantship

Survival Data Analysis and Lab   Fall 2025
Advanced Undergraduate Course
- Led hands-on lab sessions on survival analysis and graded assignments and exams.

Selected Topics Seminar   Spring 2025
Introductory Undergraduate Course
- Organized weekly discussion sessions and advised on data analysis projects.

Mathematical Statistics 2   Fall 2024
Core Undergraduate Course
- Held office hours, graded assignments and exams, and prepared solution sets.

Statistics Lab   Spring 2024
Introductory Undergraduate Course
- Evaluated Python programming assignments and exams and held office hours.

Employment

Hankuk University of Foreign Studies – Insight Camp   Jan. 2019 – Feb. 2019
Academic Mentor
- Provided residential academic mentoring and taught math and English classes in a 4-week program.
- Created problem-solving exercises and offered individualized tutoring.

Projects

Survey Design and Analysis for the SNU Panel of Youth (SNUPY)   Oct. 2024; Dec. 2025
- Constructed stratified cross-sectional and longitudinal sampling weights using the R `survey` package.
- Advised on missing data imputation and weight calibration.

Modeling Risk Factors for Mortality and Hospitalization   Sep. 2025
- Analyzed clinical risk factors for mortality and hospital stay using GLMM and multiple imputation, addressing repeated events and missing data.

Bitcoin Chart Pattern Image Recognition and Price Prediction   May 2022 – Jul. 2022
[GitHub Repository](#)
- Implemented Monte Carlo Dropout in the N-BEATS time-series neural network to quantify and visualize predictive uncertainty.

- Augmented chart image data using probability distributions, resulting in a 10% increase in accuracy.

Optimizing Pricing Strategies for a Low-Demand Food Product   May 2022 – Jun. 2022
- Designed an online survey and conducted a conjoint analysis to identify consumer preferences.
- Developed a Python algorithm to estimate the profit-maximizing bundle price for the food product.

Data Visualization of Job Openings in Korea   Nov. 2021 – Jan. 2022
GitHub Repository (In Korean)
- Extracted and preprocessed 36,000 job postings and 11,000 resumes by identifying HTML patterns.

Skills & Languages

Software R, Python, LaTeX, SAS, ArcGIS, Stata, SPSS
Languages Fluent in both English and Korean
